ABOUT ME

Hello, my name is Mikkel and I am a Software engineer with a BSc from Aalborg University. My interest for programming originated at an early age, with me being very fascinated by computers and especially video games, which also ended up becoming my introduction to programming and many of the principles it entails. This fascination quickly evolved to something bigger, as the curiosity and the desire to learn grew as I tried coming up with solutions for each and every problem. I therefore hope to find a position, with the possibilities for me to better my skills, from new and exciting challenges. In me, you will get an employee who is creative, detail oriented and enthusiastic about learning new technologies and skills, as well as someone who loves being challenged with new problems.

WORK EXPERIENCE

📅 2020	Tutor, Software
📍 Aalborg University	
📅 2018 - 2019	Warehouse operative
📍 Textile Logistics, Ikast	

EDUCATION

📅 2015 - 2018
📍 Herningsholm Erhvervs gymnasium, HTX, Herning

OTHER SKILLS

Curious Quick learner Enthusiastic Structured Detail oriented
Teamwork Diligent Creative Responsible

OTHER INTERESTS

Disc Golf

I was in the summer of 2021 along with a few friends, introduced to disc golf, and have ever since been hooked on throwing plastic discs after baskets, and getting out and enjoying the nature in a new way.
